

8 Reasons to Finance Equipment for Your Business

4 out of 5 US businesses finance their equipment and technology purchases, here's why:

Protect Cash Flow:

Protect vital cash flow for other areas of business, such as expansion, improvements, marketing, or research and development.

Consolidate Corporate Debt:

Unlike bank loans, individual leases can be consolidated into a larger lease. This allows for lower rates and greater flexibility to match your monthly expenses to cash-flow.

Eliminate Obsolescent Technology:

Acquire the newest and best technology on the market, and never be tied down by outdated equipment or manufacturers.

Outsourced Asset Management:

WFS can manage your equipment from start to end, alleviating the burdens of everything from delivery to disposal.

Accelerate and Maximize ROI:

Avoiding large down payments and capital outlays allows for positive return on your investment from day one.

Set and Customize Terms:

WFS offers creative, flexible, and customizable opex and capex structures. Maximize cash flow and account for income fluctuations.

Benefit of Bundling:

Bundle equipment, installation, maintenance, and more into a single, easy-to-manage and cost-efficient solution.

Hedge Against Inflation:

Lock in rates when you sign your lease to protect against rising interest rates.
