WINSLOW Technology Group

WTG AI Launchpad

Your AI Initiatives. Cleared for Takeoff.

AI-AS-A-SERVICE (CO-MANAGED) FROM

$2,000

PER MONTH

A proven, private AI foundation, engineered by Winslow Technology Group, that empowers your organization to creatively experiment, build, deploy, and scale without starting from scratch, sacrificing control, or incurring unexpected costs.

01 DATA SOVEREIGNTY

Keep prompts, documents, embeddings, and inference inside your environment. Local processing ensures AI workloads are off public AI services and prevents them from becoming training data for a third-party model.

Keep sensitive AI workloads inside controlled infrastructure.

02 PREDICTABLE ECONOMICS

Run every day AI workloads locally to reduce token costs and keep spending predictable. As AI routing evolves, leverage model tiering to optimize cost, when needed.

Predictable local capacity, open-source software and controlled token consumption.

03 VISIBILITY + PORTABILITY

A policy-based AI router provides centralized visibility and directs workloads across local and approved external models. Mix models, preserve portability, and reserve premium token-based services for defined use cases.

One control point for visibility, routing, and model choice.

Remove the per-prompt meter for local workloads and reduce confidentiality friction and unpredictable expense that can constrain experimentation. Use the router when a use case warrants an approved external model.

A PROVEN, REPEATABLE AND SUPPORTABLE PRIVATE AI STACK:

HARDENED CORE	CONTAINER + RUNTIME	RIGHT-SIZED AI	READY TO USE	CONTROL PLANE
Linux OS GPU/NPU Software	Docker Model Runtime/Server	GPU-Aligned Model of Your Choosing	API Endpoint Chat + Web Admin	LLM Router Web Proxy

CHOOSE YOUR DELIVERY MODEL:

YOUR HARDWARE | WTG AI Launchpad
Proven stack, deployed into your infrastructure

- You procure compatible infrastructure (including cloud)
- We deploy and configure our validated Launchpad architecture
- Best for teams prepared to own lifecycle operations

RECOMMENDED | WTG PolarisAI (AI LAUNCHPAD AS A SERVICE)
The fastest path to production, backed by the engineers who built and repeatedly deployed the stack.

- Purpose-fit AI hardware included
- Proven architecture, installation, configuration and production handoff
- Continuous monitoring, scheduled maintenance (including security patching), and SLA-backed WTG support
- Access to advanced services, including data science and model/workload optimization

88% use AI in at least one business function. MCKINSEY 2025

64% say AI is enabling innovation. MCKINSEY 2025

54% would use AI tools even if not authorized when the right tools are unavailable. BCG 2025

91% say managed services are important for agentic AI delivery. KPMG / IDC 2026

Sources: McKinsey, The State of AI in 2025; BCG, AI at Work 2025; KPMG Managed Services Outlook Survey 2026, with research and analysis by IDC.

Service and product features, specifications, pricing, and availability are subject to change. Performance results may vary based on individual use, system configurations, and environmental factors. WTG does not warrant that the software or hardware will be uninterrupted or error-free.
